## University Of Arizona, Arizona Stadium Technical Rider Addendum

All Acts To Perform April 29th, 2009 at Arizona Stadium, Tucson, AZ. To: From: Production Manager & Designer, Pat Ibbotson, Consulting On Behalf of the University of Arizona The University Of Arizona Concert Planning Staff & Administration. CC:

Forward:

Due to the unique requirements, rules, restrictions, available technical space, and time limitations involved with performing at Arizona Stadium; The following edits are made all Artists' technical riders & contracts as a necessary component of a successful show. All Artists should be assured that every effort will be made to accommodate their specific needs in a professional manner to the highest standards. This show is listed as "festival billing", located on The University Of Arizona Campus, and carries with it the expectation and necessity of general flexibility on and off the stage( Please take a moment to review all of the conditions and stipulations made herein as we work towards the best show possible.

#### 1. General Disclosed Restriction:

Due to the proximity of this stadium to residential neighborhoods, and the necessary sound system involved to cover the estimated 17,000 attendees, The University of Arizona reserves the right to control the overall volume of the performance. It is acknowledged that this is a concert, the students want a great show, and it is expected to be generally loud. Therefore, every step possible will be taken so as not to interfere with Artist's engineer but this right must be reserved.

#### 2. Climate Considerations:

Due to an average rainfall in Tucson, Arizona in April of a third of an inch, as well as the general dimensions of the seating vs. the only available location for the stage not having sufficient room for ballasting, no roof system will be utilized for this show. The University of Arizona will secure FOH tenting being removed prior to doors opening. Tarps/Plastic/White Drops will be p sufficient qty for equipment along with sufficient crew to set and remove them. Should temperatures exceed the expected averages in April, sound checks will be moved to ear inclement weather insurance, Mix positions will have temporary tents during the daytime with the FOH tenting being removed prior to doors opening. Tarps/Plastic/White Drops will be provided in temperatures exceed the expected averages in April, sound checks will be moved to earlier in the day, with the stage "going dark" during the afternoon hours. Sunset is approximately 7pm.

with tetist approval

3. Venue Access & Schedule:

All Artists & Artists' technicians will be provided with a schedule outlining their load in, line checks, (sound checks if applicable) & performance times in advance of the show. As acts are still being added to the festival's billing this schedule is not complete. Artist crew & equipment can expect a call time of approximately one hour prior to their expected line or sound check or as per final advance. (Snd/Line Checks are estimated to begin at 11am, with Doors Opening at 5pm.)

4. Crew: -PCR APTST RidOC

The University Of Arizona will be providing and paying for professional stage hands, student workers, as well as a first class engineering support team from each of the respective technical supplier's onsite in sufficient quantity to execute the T6A schedule and general plans. Note: Bisrespect of any member of The University of Arizona Staff, Student Workers, Crew, Stagehands, etc. will not be tolerated. If there is a rare issue, it is expected that, it will be handled in the University of Arizona S start student workers crew stagehands, etc. will handle it a professional manner and discussed with the Production Manager.

5. Staging: - PER TRIBE RIDGE

Final stage design is still tbd, however at a minimum; A professionally built, level & safe, 42' wide x 36' deep x 5' high performance stage will be provided. Additional wing space will be provided on the downstage edge for PA stacking. Dead case storage, backline world, and monitor control will be located at near ground level due to sight lines at this venue. Ramps will be provided for easy access.

6. Backling: - Per Artist Rider

For those Artists who are flying for this performance, backline arrangements will be secured by the University. While we-will-make-every-effort-to-avoid-any-grossovers, it-may be necessary (thoughunlikely) to share some backline-items, riser positions-etc? Backline storage and tech world for any act not performing will be located offstage left at ground level. (Ramps will be provided for easy

7. Monitors: (Console-PM5D) - PER ARTIST RIJOR

Monitor control for all Artists will be stage right at ground level. Biamped monitor cabinets, side fills & drum fills in sufficient qty and with all necessary amplification and processing to satisfy all riders will be provided. Monitor cabinets may need to be moved in between sound checks/sets etc to accommodate another act. Monitor world will be shared between all acts, as such; minimal space will be available for supplementary equipment. Please have your engineers advance what equipment (in ears, console etc) they may be bringing with them so that we can make the appropriate arrangements.

8. FOH: (Console-PMSD) - PUR ARTIST RIVER

FOH control for all Artists will be located approximately 80'-100' from the downstage edge as close to center as the venue will allow and approximately 16'x16' in total area.
